ABOUT ME

I'm a dedicated **Game Designer** with the goal of creating meaningful experiences. During my four years of study at U-tad, I gained experience in prototyping and documentation, developing strong analytical and problem-solving skills. From GDDs and automated Excel tables, to Systems Design and balancing. My personal experience playing many different game genres has given me a mental library of references I can pull from, which makes me versatile as a designer.

COMPETENCES

Unreal
Engine

Blueprints

Unity

C#

Notion

GitHub

Jira

Excel

ACADEMIC BACKGROUND

Interactive Product Design – U-tad (2022-2026)
(Graduated this year, program in English)

Participation in multiple masterclasses, including:

TEQUILA WORKS: How Video Games Tell Stories.

U-TALKS: Accessibility and Videogames.

The Universe of **EPIC GAMES**.

Intensive Narrative Course (3 sessions)

BFP: Focused on redesigning the concept of a boss and creating meaningful experiences.

SCIENCE HIGH SCHOOL DIPLOMA

Colegio Los Ángeles, Getafe.

First year of studies completed **abroad** in Ireland.

SOFT SKILLS

CREATIVITY & INNOVATION

I'm always looking for new ways to express ideas, whether through game design, storytelling, or artistic concepts.

CURIOSITY & PROBLEM SOLVING

I enjoy researching diverse subjects and maintaining an open mindset, which enables me to come up with innovative and creative solutions.

ADAPTABILITY & QUICK LEARNING

I adapt rapidly to new environments and tools, embracing change as an opportunity to grow.

TEAMWORK & COMMUNICATION

I value teamwork as a way to complement my abilities and to contribute with my own perspective to create something greater together.
